

NISHANT PHULE

Backend Engineer | AI-focused

Nashik, India · 9960435035 · nishantphule12@gmail.com · linkedin.com/in/nishant-phule-b274ba1b7 · github.com/Nishantphule

SUMMARY

Backend engineer with 2+ years shipping production APIs, secure auth, and applied LLM features. Promoted to Software Engineer in Dec 2025; currently converting legacy systems to React/Node while building an LLM-powered project-management product. Upskilling in AI engineering with Airtribe since Nov 2025.

SKILLS

Node.js, Express.js, Django, Python, JavaScript, MongoDB, MySQL, REST APIs, OpenRouter/LLMs, n8n, Razorpay, Docker, AWS, Firebase, React, React Native/Expo, Git, CI/CD, Postman

EXPERIENCE

Four Pillars Infotech India Pvt. Ltd. — Software Engineer

Dec 2025 – Present

Mumbai

- From Feb 2026, led a small engineering team on a client engagement — sprints, delivery, feature releases.
- Core contributor on legacy conversion to React and Node.js — services, UI, and production rollout.
- NAD DigiLocker integration for secure document verification and authentication.
- n8n flows for backup management and real-time alerting; application security (auth, RBAC, API hardening) and admin work.
- Building and shipping the internal Project Management Tool (React, Node, MongoDB, Razorpay, OpenRouter LLMs); used internally and being scoped for launch.

Four Pillars Infotech India Pvt. Ltd. — Associate Software Engineer

Jun 2024 – Dec 2025

Mumbai

- Full-stack delivery across MSBTE digital government portal projects (backend first).
- Migrated 5 legacy PHP modules to Node.js and Django.
- Contributed to a Django admin dashboard (RBAC and analytics) as part of a team.

Increditex Software Solutions Pvt. Ltd. — Jr. Software Developer

Feb 2024 – May 2024

Nashik

- Built Node.js/Express APIs with Sequelize for a matrimony platform, including data models and business workflows.
- Shipped a React (Bootstrap) frontend for a sports-news site and supported deployment and QA.

Freelance Web Developer — Self-employed

Nov 2023 – Jan 2024

Nashik

- Delivered full-stack MERN applications with Razorpay payment integration, hosted on AWS.
- Worked directly with clients on requirements, delivery, and production hosting.

FLAGSHIP PROJECT — PROJECT MANAGEMENT TOOL

Internal product; being scoped for launch · React, Node.js/Express, TypeScript, MongoDB

- Designed a multi-tenant Express API on MongoDB: organization/team/task schemas, JWT access + httpOnly refresh cookies, Socket.IO notifications, Zod validation, and Helmet/rate-limiting.
- Implemented Razorpay Standard Checkout: order creation, client confirmation, and HMAC-verified payment.captured webhooks that activate Free/Pro/Pro+ subscriptions.
- Shipped OpenRouter LLM features with deterministic fallbacks so AI never takes down the API: task generation (title/description/tags), chat-thread summarization and task extraction, an in-thread assistant, and suggest-only bug-severity classification.

EDUCATION

AI-First Backend Engineer — Airtribe (in progress)

Nov 2025 – Present

Full Stack Web Development — Guvi, IITM Research Park, Chennai

Jan 2022 – Aug 2023

B.E. Mechanical Engineering — GES College of Engineering, Nashik · CGPA 7.83

Aug 2018 – Jun 2023

ACHIEVEMENTS

100 Days LeetCode badge (May 2024) · Top 10, Upskill Mafia Online Web Hackathon · GeeksforGeeks, Udemy, 100xDevs certifications
