SUMMARY

Backend engineer targeting Backend Engineer / Backend Engineer (AI) roles. 2+ years shipping production Node.js and Django APIs, secure auth, and applied LLM features (OpenRouter, n8n). Promoted to Software Engineer in Dec 2025; converting legacy systems to React/Node and shipping an internal project-management product. Upskilling in AI engineering with Airtribe since Nov 2025. Led a small client team from Feb 2026.

SKILLS

Backend: Node.js, Express.js, Django, Python, REST APIs, MongoDB, MySQL, Sequelize

AI / automation: OpenRouter LLM integration, n8n agents, prompt + fallback design, embeddings

Security: Auth flows (JWT, OTP, TOTP/WebAuthn in product work), RBAC, API hardening, rate limiting

Cloud / DevOps: Docker, AWS, Git/GitHub, CI/CD basics, bash/cron, Postman

Frontend / mobile (supporting): React, React Native, Expo, Firebase, HTML/CSS

Payments: Razorpay (orders, signature verify, webhooks)

EXPERIENCE

Four Pillars Infotech India Pvt. Ltd. — Software Engineer

Dec 2025 – Present

Mumbai

- From Feb 2026, led a small engineering team on a client engagement — sprint/agile delivery, reviews, and feature releases.
- Core contributor on legacy conversion to React and Node.js — services, UI, and production rollout.
- NAD DigiLocker integration for secure document verification and authentication.
- n8n flows for backup management and real-time alerting (applied GenAI/ops, not just chatbot demos).
- Application security across the stack: authenticated API flows, role-based access control, input validation, and rate limiting; admin work on production portals.
- Building and shipping the internal Project Management Tool (see Flagship): React, Node, MongoDB, Razorpay, OpenRouter LLMs — used internally and being scoped for launch.

Four Pillars Infotech India Pvt. Ltd. — Associate Software Engineer

Jun 2024 – Dec 2025

Mumbai

- Full-stack delivery across multiple MSBTE digital government portal projects; backend and architecture first, UI as needed.
- Migrated 5 legacy PHP modules to Node.js and Django, improving scalability and maintainability.
- Contributed to a Django admin dashboard (RBAC and analytics views) as part of a team.

Key government-portal work

- NAD DigiLocker — secure document verification/authentication on production portals
- Django admin dashboard — role-based access and analytics views
- Legacy modernization — 5 PHP modules moved to Node.js and Django
- Client web + mobile (in progress) — React/Node with Firebase and Expo push notifications

EXPERIENCE (CONTINUED)

Increditex Software Solutions Pvt. Ltd. — Jr. Software Developer

Feb 2024 – May 2024

Nashik

- Built Node.js/Express APIs with Sequelize for a matrimony platform, including data models and business workflows.
- Shipped a React (Bootstrap) frontend for a sports-news site and supported deployment and QA.

Freelance Web Developer — Self-employed

Nov 2023 – Jan 2024

Nashik

- Delivered full-stack MERN applications with Razorpay payment integration, hosted on AWS.
- Worked directly with clients on requirements, delivery, and production hosting.

FLAGSHIP PROJECT — PROJECT MANAGEMENT TOOL

Internal product; being scoped for commercial launch · React, Node.js/Express, TypeScript, MongoDB

- **Architecture:** Multi-tenant Node/Express 5 + TypeScript API, MongoDB/Mongoose (Organization, Team, Task, User, billing, chat). JWT access + refresh in httpOnly cookies, org-scoped RBAC, Zod validation, Helmet, auth rate limits, Socket.IO for live notifications/presence. Redis used as an optional shared cache.
- **Payments:** Razorpay Standard Checkout — POST /api/billing/checkout creates an order, POST /api/billing/checkout/confirm plus HMAC-verified webhook on payment.captured / order.paid; PaymentOrder states created → awaiting_capture → paid/failed; plans Free / Pro / Pro+ (monthly, yearly, lifetime) with coupon support.
- **LLM (OpenRouter, OpenAI-compatible SDK):** POST /api/tasks/generate-description (title, description, tags, assignee hints); chat .../ai/summarize, .../ai/extract-tasks, .../ai/ask; suggest-only bug-severity classification; AI progress/EM digests. Failures return a deterministic fallback so the API does not 500.
- **Product depth:** Real-time org chat, GitHub activity tied to tasks, LLM-assisted repo security review, nightly Mongo backups, and plan-gated entitlements — shipped for internal use and being scoped as a commercial product.

EDUCATION

AI-First Backend Engineer — Airtribe (in progress)

Nov 2025 – Present

Full Stack Web Development — Guvi, IITM Research Park, Chennai

Jan 2022 – Aug 2023

B.E. Mechanical Engineering — Gokhale Education Society's College of Engineering, Nashik · CGPA 7.83

Aug 2018 – Jun 2023

CERTIFICATIONS

- Full Stack Web Development — GeeksforGeeks
- Additional: Udemy, 100xDevs

ACHIEVEMENTS / OTHER

- 100 Days LeetCode badge — May 2024
- Top 10, Upskill Mafia Online Web Hackathon
- Volunteer / Animal Rescuer — Nov 2020 – Present
- Languages: English (Professional), Hindi (Full Professional), Marathi (Native)
